*"Attain the most successful working model today with 'tried and true' clinical processes, enhanced roles and responsibilities and targeting the least developed areas in dentistry!"*

## GOAL:

To learn why a structured, science-based, interdisciplinary 'TEAM' approach to dentistry is critical in the 21<sup>st</sup> century.

## OBJECTIVES:

- Learn the most valuable 'tried and true' science-based clinical processes for new patients and patients of record with established criteria and guidelines.
- Maximize treatment, service and care by taking an interdisciplinary comprehensive approach when treating all patients in the 21<sup>st</sup> century.
- Create a sophisticated effective team environment with each dental team member and maximizing their roles and responsibilities.
- Understand the current landscape in dentistry and appreciate the opportunity to create a successful paradigm shift in your dental practice, change is imminent!

**Nancy Adair**  
RDH, BA

Nancy Adair is founder/owner of Hygiene Excellence Inc. and has been a dental educator at the University of Manitoba, a continuing education chairperson for MDHA, a periodontal hygienist and a dental hygiene coordinator. Hygiene Excellence is a science-based accredited continuing education program that upholds the highest standards in dentistry with a 'tried and true' set of systems and processes. Hygiene Excellence has been awarded PACE (Programs Approved for Continuing Education) status in Alberta, Canada and has been awarded maximum CE credits from CRDHA (College of Registered Dental Hygienists of Alberta). Eligible CE program in Manitoba, British Columbia, Ontario.
